

Valuation for pricing:

- We have used Costco as a benchmark to determine whether a price is high or low; for now, we tentatively set the price for “Pooled” at 1.2 times the Costco price.

To analyze the competitive ability for Pooled, we have set 5 factors of competition.

Price Affordability

1. More than 40% more expensive than Costco
2. 21-40% more expansive than Costco
3. 6-20% more expansive than Costco
4. Within 5% more or less of Costco’s price
5. More than 5% cheaper than Costco

Purchase Quantity Flexibility:

1. Customer must purchase large wholesale package with no option to buy smaller portions
2. Most products are sold in large, fixed quantities
3. Products are sold in fixed package sizes, including some smaller packages
4. Customers can choose from multiple package sizes or purchase relatively small size
5. Customers can freely select the quantity they need, including small size of bulk products

Product Variety:

1. Very limited assortment, mainly focused on one narrow product category
2. Limited assortment, specializing in a few related product categories
3. Moderate variety, covering several common shopping categories
4. Wide variety across many categories, but some has less goods choose from
5. Extensive variety, include most everyday shopping needs

Delivery Convenience:

1. In-store shopping only, with no delivery or online pickup
2. Customers must pick up orders at limited locations or only on certain days.
3. Convenient pick-up options, but no home delivery service; Basic delivery, but no pick-up service
4. Both home delivery and pick-up are available, with some restrictions or additional fees
5. Both home delivery and pick-up are available, with only small amount of fees

Bulk Coordination Convenience:

1. Customers must manually find buyers, coordinate orders, and arrange distributions
2. Some coordination tools are available, but customers still manage most of the group-buying process
3. The platform supports group formation and ordering, customer still handle some important coordination tasks
4. Most coordination activities are managed by platform, with minimal customer involvement
5. Customers can purchase without coordinating with others, additional customer service able to support
